The Election

Friday, March 28, two trustees will be elected to the school boards of both the Campbell Union High and Grammar schools. Good citizens will avail themselves of their privilege to express at the polls their preferences. Some time between the hours of one and six o'clock you should appear at the balloting place and cast your vote for two trustees for each school—preferably, in the case of the high school, for the two incumbents who stand for economy and progress.

The Candidates

Candidates for grammar school trustees are J. B. Collins of San Tomas district, incumbent, and W. C. Bohnett who will without contest be elected to fill the vacancy created by the expiration of the term so ably filled by Dr. W. I. Merrill. The high school election, on the other hand, will probably be a bitterly contested affair. Seeking to displace E. H. Todd of Union and F. W. Mitchell of San Tomas, incumbents and candidates for re-election, are Levi Hiatt of Cambrian and E. B. Thrift of Meridian. Todd and Mitchell have declared themselves for a progressive and economical program which encompasses the erection of a new high school plant. Their opponents, it is generally understood, are for nothing in the way of a new high school—or anything else which would tend to relieve the condition of inadequacy which exists in the present high school plant.

A Ridiculous Rumor

In the outer fringes of the districts which comprise the Campbell Union High School district there is current a rumor that workers for a new high school want to erect a four hundred-thousand dollar building. It is easy enough to guess the originators of so absurd an idea—and people generally will recognize it for what it is, namely, a fabrication designed to cause the voters to lose faith in the present school board, none of whom, by the way, want to spend any more money than is necessary to construct a safe, presentable and adequate building.

Voters Cannot Dodge the Issue

The results of the election Friday will indicate whether or not citizens of this district are trying to evade what is the sacred

CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA

TUESDAY, MARCH 25, 1930

RECORD VOTE PREDICTED FOR SCHOOL ELECTION FRIDAY

Buddies

By Albert T. Reid

Convention Delegates
Elected By Rebekahs

Anna Bachman, Wilmay Lea and Hazel McQueen were those elected to be delegates to the Rebekah convention at Oakland in May, at the regular meeting of the Ada Rebekah lodge Wednesday evening, March 19. Three candidates for membership were voted upon and two applications were taken in. April 1 the lodge will hold initiation ceremonies for a large number of candidates.

At this meeting the new regalia for the lodge officers were presented by Mrs. Ellen Snow. The regalia was made by the Stitching club.

After the business had been taken care of the remainder of the evening was spent in playing games and listening to a musical program. Light refreshments were served.

Declared Himself

J. A. Kidward has declared himself for a new high school. At the beginning of his term Mr. Kidward was on the fence, but as soon as he had time to investigate the situation from the inside he readily saw the necessity of more spacious and up to date quarters. Don't hamper the progressive trustees by electing to the board two men who are, it is reported, not interested in a new school.

That's all.

LOCAL MASONS ARE
PRESENT AT FETE
FOR GRAND MASTER

More than 1,000 Masons of Santa Clara, San Benito, Santa Cruz and Monterey counties gathered at the Scottish Rite temple in San Jose last night for one of the most successful meetings in the history of local Masonry.

The Campbell Masonic chapter was well represented at the meet with 20 members of the lodge present.

Dinner was served at 6:30, followed by a musical program which included an organ recital by Lucille Thurmond, singing by the Scottish Rite quartette, members of which are E. J. Ferguson, Amos Williams, Frank Towner and Claude Starke; solos by Ferguson and Towner, followed by another quartette number accompanied on the organ by Charles Haywood.

Immediately following the musical program a most interesting address was delivered by Charles Wollenberg, grand master of California and Hawaii, in whose honor the dinner was given, entitled, "Masonry as I see it in California."

Another distinguished guest of the evening was M. M. Johnson, past grand master of the Masons of Massachusetts, and he spoke on "What Masonry is as a constructive philosophy for building manhood in community life."

A. M. FREE TO GET
NAUTICAL SCHOOL
BOAT FOR CALIF.

Congressman A. M. Free of this district today introduced a bill in congress for the approval of \$125,000 to be spent by the secretary of the navy in fitting up the steamship Henry County with class rooms to be used in connection with the new nautical school which has just been established for California.

The steamship Henry County is to be turned over to the state of California by the navy department for the purpose of educating boys who desire to follow the sea.

Moreland Goodwill
Club Met Wednesday

The regular meeting of the Moreland Goodwill club was held at the home of Mrs. Grunell Wednesday afternoon, March 19.

The business session was held and a talk given on a trip through the European countries by Mrs. Durst, who has just recently returned from a trip abroad. Dainty refreshments were served by the hosts.

The next meeting of the club will be with Mrs. A. A. Earl Wednesday afternoon, April 9, at her home on Payne avenue. A dinner will be given at the club house this Thursday evening in honor of the 25th anniversary of the club.

Members and their husbands will be the guests.

BULLETIN

Original plans for the Sea Scout court of honor took the ceremony away from Campbell and put the local group with the San Jose division which is to be held at the St. Leo parish hall in San Jose. Through the efforts of Dr. W. I. Merrill of the local scout committee, arrangements have been made to hold a court of honor at the Scout building in Campbell Monday evening, March 31 at 8:30 o'clock.

It is urgently requested that all the parents of the Sea Scouts be present and for them to invite particularly adult friends who are interested in this most important work.

A short program will follow the court of honor.

LOCAL FIREMEN
EXTINGUISH BLAZE
AT PEAKE HOME

At 3:30 o'clock this afternoon the local volunteer fire department received a call from Mrs. F. E. Peake of Los Gatos road. Although the fire was slightly out of the district the boys responded rapidly and arrived at the scene of the conflagration in time to save the Peake home.

The blaze had a good start before the department was called, but despite the fact that no fire plug was convenient the volunteers entered the burning dwelling with chemical apparatus and subdued the flames.

Mrs. Peake was generous in her praise of the fire boys and said that but for their prompt response the building would have been a total loss.

The damage, which did not exceed \$500, was fully covered by insurance, according to G. E. Farley, local insurance broker.

C. H. WHITMAN
REMODELS STORE

For the past week C. H. Whitman has had carpenters working in his store, remodeling and making several improvements. The stairs which were hidden by the office and which led up to the balcony have been taken out and placed on the other side of the office where they can be seen, giving ready access to the shelves of merchandise on the balcony. The old office upstairs has been removed to make way for more merchandise. A great improvement has been effected as far as lighting, room and looks are concerned.

Oluf Strom is in charge of the work, although the store will attend to the decorating of the new woodwork.

There will be a Kiwanis card party at the Community hall Saturday night, March 29. Lots of prizes will be given.

STRENUOUS FIGHT OVER HIGH SCHOOL
TRUSTEE POSTS FORESEEN; TODD AND
MITCHELL WIN, PROGRESSIVE'S GOAL

Considerable interest has been aroused in the election of school trustees which will take place Friday, March 28. Two trustees are to be elected for each of the school boards. The grammar school election is cut and dried with Collins and Bohnett conceded an uncontested victory.

The high school election is a horse of another color in which strong differences of opinion regarding the necessity of a new high school are expected to bring out a record vote. Todd and Mitchell, incumbents, will be supported by the progressive element of the union high school district against Hiatt and Thrift who are frankly against any action regarding a new plant for the school.

Feeling in the district is running high with all indications pointing toward a vigorous attempt by both factions to put their candidates into office. Supporters of Todd and Mitchell are confident of victory, unofficial campaign managers report, and every effort will be made to get out the full registered vote.

Similar preparations are being made in the camp of the Hiatt-Thrift forces, while interested but unopinionated onlookers predict a close race.

Balloting will take place between the hours of one and six o'clock at the grammar school building in Campbell for grammar school trustees. To make known their selection of high school trustees, voters of Cambrian district will between one and six o'clock cast their ballots at the Cambrian Grammar school; Moreland voters at the Moreland Grammar school; Union at the Union grammar school, and Campbell, Hamilton, Meridian and San Tomas will vote at the Campbell Union Grammar school.

HYDE'S CANNERY
WILL OPERATE AS
USUAL, SAYS SQUIBB

A representative of the Press called on Mr. Squibb, secretary of the Geo. E. Hyde & company cannery regarding the operation for the coming season, and he advised us that the prospects for the year were very encouraging and that he looks for a larger and long season than the cannery has enjoyed for several years.

Our representative informed Mr. Squibb of the rumors going the rounds that the plant was closed up and would not operate, and in his reply he stated that he has been at this plant for the past five years and each year he has been compelled to reply to these non-operating rumors, and in answer to our question as to how, in his estimation they start, he stated that perhaps it was due to the fact that each spring when all work has been cleaned up all the help has been laid off pending further or new business and this year has been no exception, that in fact we have pruned down to the bone this year even closer than ever.

Mr. Squibb further stated: "I am sure that the business men who are behind this firm at this time would not even consider such a step, as they have the pride and goodwill of the community at heart and I am sure when the American Trust company and their good and efficient officers of this bank here believe in us, why should our good neighbors spread these unfounded statements, which are not only detrimental to the company but to the district as well."

"You can make it as strong as you please in denying these statements, for as far as I know this plant will be in the field as usual and I believe I would be the first to learn of any plans to the contrary."

"Whether the present officers or help who have and will be laid off gets other work or not, I am advised that this plant will operate."

Shell Company Will
Erect Giant Signs

The Shell Oil company, according to G. E. Farley, publicity committee chairman of the local chamber of commerce, is prepared to erect two of their "town identification" sign on highways approaching Campbell, provided permission to use roadside property be obtained by the chamber of commerce.

Mr. Farley has been in communication with property owners hereabouts and reports fairly satisfactory progress in obtaining suitable sites for the signs.

READ THE PRESSMILLER JAILED ON
CHARGE OF DRUNK
DRIVING THURSDAY

J. C. Miller of Campbell was put under arrest Thursday evening on a charge of driving while intoxicated. He was apprehended when his automobile featured in a crash with another car, a dodge sedan which was parked in front of the L. E. Eddleman home on Campbell avenue. The occupants of the car were visiting with the Eddlemans. Not much damage was done to the parked car but Miller's car was considerably smashed up.

Miller was arrested by Deputy Sheriff George Barnes and Constable Frank Coupland and is now in the county jail.

LOCAL SEA SCOUTS
MAKE FINE RECORD

The Campbell Sea Scouts stand second in the ranking of the Sea Scouts in the United States. They also stand first in this district, which covers California, Nevada, Arizona and Utah. The national honor flag of the Sea Scouts will be presented to them March 31 at St. Leo's parish hall in San Jose by T. J. Keane, national Sea Scout director. This will be quite a distinction and an honor that is coveted by all troops of Sea Scouts.

Campbell supporters of the Boy Scout movement are going to try to secure the ceremony for Campbell, which, after all, is the right place to have it, in view of the fact that the Campbell troop won the flag. Later reports in the Press will chronicle the degree of success achieved in this endeavor.

The local scouts have received no outside aid. The Congregational church has stood behind them from the beginning, providing housing and lighting facilities for them at all times. The troop was organized by Rev. J. H. Bennett over two years ago for the purpose of taking care of the older boys who wanted to continue the scout work after they had passed the age limit for regular boy scouts. The good work has been carried on by Worthin and Gene Grattan. To these two will go the credit of continuing the splendid work of guiding this group to their success.

There are 21 members in the local troop and during the past year they have won many honors in all work pertaining to the sea, and upon this work is based the national and district rating.

Members of the Campbell troop and their positions are:

Alfred Beer, coxswain; Lloyd Brown, yeoman; Harris Gardner, pharmacist; Bradford Jones, able seaman; Herbert Pryor, machinist; William Mattush, carpenter; Ivan Nelson, sailmaker; Perley Payne, able seaman; Henry Rutheck, coxswain; Miles Standish, signalman; Elwyn Stewart, able seaman; Elwood Swane, chief boatswain; Elmer Sundquist, quartermaster; Earl Vaughn, able seaman; Noel Voge, waterman; Richard Watkins, steward; George Barnes, Thomas Hiatt, Robert Cunningham and Ernest Rogers are new members of Troop 26 and have the position of cabin boys.

PAGES OPEN SHOP
IN GARDEN CITY

E. A. Page and Donald Page of Campbell recently bought out the jewelry store located at 26 East San Antonio street in San Jose known as "The Midget Jewelry and Diamond Den."

The store opened under the new management Monday, and Campbell people are invited to visit the pages shop whenever they are in San Jose. Donald Page has been in the business for 12 years, the past five of which he has spent in the employ of Burnett Bros. in San Jose. The elder Mr. Page has been in the game for 20 years and is experienced in all phases of watch and jewelry repairing.

Crack Jumper Tops Human Hurdle

The horse's feet didn't slip, so the trick worked. The horse was "Applejack," the army's jumping champion, and he's shown here being put through his paces by Sgt. F. York—a cousin of Sgt. Alvin York of World War fame. The human hurdle is Private Lockwyn and the scene is the United States cavalry camp at Fort Meyer, Va.

VESSEL BATTLES FURIOUS STORMS

Epic Struggle of Crew and Passengers in Amazing Sea Adventure.

Oban, Scotland.—That truth is stranger than fiction has been proven many times, but once again it has been exemplified in the adventurous voyage of the schooner Neptune II from St. John's, N. F., to the quiet harbor of Oban.

Many far-fetched ideas have been made the subject of novels, but no one has ever conceived the notion of a small vessel being driven right across the Atlantic, surviving the fury of such tremendous gales as were experienced during the month of December and the first fortnight of January, escaping the dangerous coast of wild Donegal and the equally dangerous reefs, rocks and islands of the west coast of Scotland and eventually after 43 days coming peacefully to rest in this placid harbor, says the New York Times.

This thrilling epic of the seas is now made light of by the quiet unassuming young captain, Job K. Barbour, the young members of the crew, the weatherbeaten boatswain, Peter Humphries and his wife, the only woman fated to endure such terrifying experiences.

The Neptune II, a small three-masted schooner of about 100 tons, had been stanchly built of good oak, which well resisted the fury of the Atlantic seas. Her timbers are about fifteen inches thick, she is calked and pitched both outside and inside, and her captain says she was without a leak during the whole of his long voyage.

Relates Epic of Sea.

The "protest" against wind and weather entered by the captain immediately after landing in Oban—a document couched in ancient legal terms—provides a story that has perhaps never been equaled in the history of such formalities. It narrates that "the said vessel, being then tight, staunch and strong, well manned, rigged and tackled, the masts and pumps well bound, the hatches properly secured, the cargo carefully stowed and the vessel being in every other respect well provided, furnished and made ready for the seas and fit to perform the intended voyage," set sail from St. John's, N. F., at 6 p. m. on Friday, November 29, 1923.

Then follows the narrative of "the said intended voyage," which developed from a coastal run of about 100 miles to a protracted and devious journey which is calculated to have covered at least 5,000 miles. On board were a crew of six, including the master, and five passengers. Nine other vessels of the same type left St. John's the same evening, and the majority of these had a perilous time, several being lost and two still not accounted for.

After leaving St. John's the vessel encountered a severe snowstorm and gale from the southwest, and when the Neptune was off Cape Bonaville, only 30 miles from home, the gale increased to such force that she was driven out to sea in a northeasterly direction. The crew experienced terrible hardships during that snowstorm. The ropes and sails were covered with snow and ice, the ropes being as thick as a man's arm and the sails stiff with ice.

The vessel was blown out to sea on the morning of Saturday, November 30, and had to continue before the wind for several days. Then she heaved to in the hope that the wind would change. There was dashed when a further terrific gale off the coast sprang up on Thursday, December 3, and the little vessel had again to flee before the angry winds and seas. It was in this gale that the wheelhouse was broken and washed away, the steering wheel broken and the steersman almost washed overboard.

A Huge Sea From Astern.

The steersman was Peter Humphries. He graphically describes the huge sea which engulfed the ship from astern and threw him up against the woodwork of the deck-house, picturing the mountainous wave sweeping up and breaking clean over the struggling little vessel. The gale continued with hurricane force over Friday, December 4, and the ship was sorely battered.

Several steamers were sighted during the voyage, and one or two of these were communicated with. The first was the Cedric, going west, which was met on December 13. This steamer lay to, and the boats of the Neptune (which were afterward smashed and broken) were launched, and an effort was made to get Mrs. Humphries aboard. This proved impossible. A ladder was lowered from the Cedric, but the sea was too rough. A canvas bag was lowered by line, and messages were put in it for St. John's and Newton, one to the marine fisheries for a tug.

The wind then had moderated and was blowing west by south, and for a fortnight the schooner made some progress toward her home coast. The captain calculated that she made about 200 miles to the west. On December 20 the steamer Beaverburn of London came alongside and made flag signals which the crew of the Neptune were unable to make out. Several other times during the night steamers were seen at various distances, but they were not near enough to communicate with.

To overcome the difficulty of signaling, the captain hit on the expedient of painting messages in red paint on the boards. He had large letters on boards, and he had various messages prepared such as "Please give us course to nearest port," and "No navigation, and no water on board." However, no other steamers were seen until the schooner was near the Bluenose lighthouse, off the west coast of Scotland. A large steamer passed at close range, but she did not understand the signals. Captain Barbour thinks, possibly being a foreign vessel.

Scarcity of Water. Added to the perils of winds and seas was the scarcity of water. When the Neptune left St. John's she had two barrels of fresh water, each containing 100 gallons. One barrel unfortunately let in some salt water. This was mixed with the water in the unspoiled barrel until the compound was just drinkable. Sugar was used to sweeten the mixture and take away the salt taste, but even at that the crew kept on strict rations.

The captain served out apples and oranges, part of the cargo, to assuage the thirst of his men, and handfuls of figs between meals. The bulky beef in the cargo was tried, but it was found to be too salt. It was cooked, therefore, it was difficult, on account of the gales, to get the hatches opened. Few regular meals were cooked, and food had to be taken as opportunity offered. Sleep was difficult. Many watches were needed, and besides it was found almost impossible to lie in the bunks, owing to the pitching and rolling of the vessel. One of the passengers, George Bunzay, was pitched clean out of his berth and suffered from his injuries for about a week. After that the men lashed themselves in their berths.

Another grave danger was the

Per Capita Wealth of U. S. Is Now \$3,000

New York.—America is getting richer and richer. The national wealth in 1923 was 300 billion dollars, according to figures just released by the National Industrial Conference Board, Inc. The last estimate, made in 1922, showed only 320 billions.

Figures show that the average wealth per capita of the United States was \$3,000 in 1923, against \$2,919 in 1922. Nevada is the wealthiest state on a per capita basis. The fortunes of its residents average \$7,338, while Alabama is the poorest, with only \$1,284 per capita. New York has \$3,513, and New Jersey, \$3,537.

Oregon's per capita wealth is \$4,244; Ohio's, \$3,118; Oklahoma's, \$1,766; Washington's, \$3,594; Pennsylvania's, \$3,300; Tennessee's, \$1,970; Texas's, \$1,986; Utah's, \$3,300; Michigan's, \$2,880; Minnesota's, \$3,483; Illinois's, \$3,282; Iowa's, \$4,675; Kansas's, \$3,680; California's, \$3,725; Arkansas's, \$1,474; Colorado's, \$3,725; Louisiana's, \$1,973; Wisconsin's, \$3,022, and Missouri's, \$3,190.

presence of gunpowder on deck. This powder had been stored in the wheelhouse, but when the wheelhouse had been washed away the powder became loose. It was secured in two barrels, covered with canvas, and lashed to one of the masts.

After running east-northward for about a fortnight, indications were found of the approach of land. Soundings were taken, and showed 150 fathoms. Sixty-two miles further on soundings showed 60 fathoms. Then, on January 14, 1930 a light was seen bearing east-north-east just about dusk. This was afterward found to proceed from the Skerryvore lighthouse, but the captain and crew were under the impression that they were in the vicinity of the Scilly Isles, and had visions of anchoring next morning in Plymouth harbor. The vessel was then hove round, and laid on a southeasterly course for about thirty miles. Other lights were sighted, but could not be identified, as there was on board no chart of the west coast of Scotland.

Carried Past the Island.

The following morning the schooner was in the vicinity of the island of Tiree. A boat with four men was observed putting off from the island and came within about a quarter of a mile, but had to return to shore, owing to the wind rising from the north. By this time the sails and rigging of the schooner were almost useless, and she was carried past the island by the wind and the set of the currents.

During the following night she was kept tacking backward and forward between the islands of Coll and Tiree and the mainland. At 8 a. m. on the morning of January 16 the vessel was found to be near the Ardmurchan lighthouse, on the mainland of Scotland. She anchored under the lighthouse, but as the boats had been smashed no landing could be effected.

Signals were made to the light-house keepers and responses were observed, but could not be understood. Later the steamer Hesperus, belonging to the Northern Lighthouse commissioners of Scotland, appeared, and, observing the schooner's distress signals, came to her assistance and towed her into the harbor at Tobermory, on the island of Mull.

On arrival at Tobermory the passengers and crew were relieved of the strain of their trying experience, and were well cared for, being specially fêted by the town council. The schooner lay in Tobermory harbor until January 19, when the Hesperus on her return journey towed her into Oban.

New Robot Bartender

Mixes Paris Cocktails

Paris, France.—The robot barman has come to Paris and French as well as American residents are pushing buttons and showing levers to get their favorite cocktail mechanically mixed.

Several specimens of the mechanical bar have just arrived from London and are making quite a hit. Press buttons Nos. 1 and 3 and you get a sidecar cocktail; buttons Nos. 3 and 2 and you get a martini. If you want a touch of angostura you push a little lever.

French "aperitif" drinkers and doctors are fighting cocktail drinking in France. The wine interests are alarmed at the waning interest in wine aperitifs. France likes cocktails and she likes the new robot bar which makes them.

TRUST IN FINGERPRINTS NOW FIRMLY ESTABLISHED

Hundreds of Thousands Are on File in United States Investigation Bureau.

Washington.—Despite the hundreds of thousands of fingerprints which the bureau of investigation of the justice department is collecting and cataloguing, it takes only five minutes for experts to discover whether duplicates of some submitted fingerprints are on file. States J. Edgar Hoover, chief of the investigation bureau. Sixteen hundred prints received in one morning's mail will be classified and letters regarding them written within 48 hours.

Neither courts nor juries need any further convincing about the reliable evidence of fingerprints. Mr. Hoover states, because while a man's appearance may change his fingerprints never do.

Some public distrust of fingerprints resulted some years ago. Mr. Hoover states, because when a well known criminal escaped from Leavenworth penitentiary his fingerprints were sent to Washington as a basis for an identification order. These prints did not tally with any fingerprint classification on file in the department. The chief of police in the town where this criminal was originally arrested then sent in fingerprints that he had taken of this man, and these were found to be entirely different from the Leavenworth prints.

The explanation, Mr. Hoover said, is that prisoners were employed in the identification work at Leavenworth. They conspired to mix the fingerprints so that those actually going on file were partly of one man and partly of another.

POULTRY FACTS

COD LIVER OIL IS GREAT NEED

Found Indispensable Where Chicks Brooded Indoors.

Where chicks are raised indoors and not in direct sunshine, they need cod liver oil in the ration. The material does not cause bowel trouble, as many poultrymen seem to think.

"Inflammation of the bowels and similar troubles with chicks is due to one of four causes—a virus, round worms, tape worms or chronic coccidiosis," says Dr. B. F. Kaupp, poultryman at the North Carolina State college. "Not only does our experimental evidence rule out cod liver oil as a cause of this bowel trouble, but it seems to rule out feed altogether. We have found that cod liver oil is indispensable where chicks are brooded in batteries or indoors. It produces greater resistance to disease and promotes better health. This means better growth and more eggs. To date no substitute for this material in the ration has been found."

Doctor Kaupp says that he has data on hundreds of tests made during the past 15 years. In no case has serious bowel trouble developed where cod liver oil was used. In the tests, oil was mixed with the mash at different times. Some of it was held four to six months before the feeding experiments were completed and in no case did the records show, either clinically or in post mortem, a serious bowel trouble.

The test did show that there are too many flocks of weak constitutional vigor and high death rate. Yet when the vitamin deficiencies were supplemented with a good grade of oil and mineral supplements used along with proper proportions of protein, health with all its natural resistance to disease was built up.

Health, vigor and strength must be put into the chicks early in life by a rich, properly balanced starting mash, says Doctor Kaupp.

Poultry Raising Made Profitable to Farmer

Poultry raising should be made one of the most profitable industries on the farm. There are thousands of farms in the country today where a few fowls are kept that are given no attention whatever, aside from an occasional feed of corn and other grain, says the Southern Cultivator. They are left to shift for themselves, to eat what they can find about the yards and barn lots and to roost on fences and trees in winter and summer. And yet, their owners will tell you that by the sale of chickens and eggs from these neglected mongrel broods half the food and clothing of their families is supplied. Like soils that are never manured and half cultivated the returns are ten-fold more than are deserved. The farmer should be a successful poultryman. He has many advantages for carrying on the business profitably that the average breeder does not possess. If he has an improved breed of fowls and the necessary accommodations in the way of houses and yards, and knows how to feed and care for his flocks, he can raise chickens at a very small cost.

Cockerels as Broilers Preferred to Capons

According to experiments conducted at the poultry department at the State College of Agriculture in New York, there is a very small margin of profit in growing capons compared to selling the cockerels as broilers. Feed seems to be the greatest item of extra cost. In some sections, relatively low feed costs and a high price for capons on account of good demand might make the business very profitable. In other localities the matter of feed, housing and labor over the period of six or eight months very often eats up the margin between the price obtainable for the broilers and the price for the capons. On the other hand capons have proved exceptionally profitable for many.

Hard-Boiled Eggs Safe Food for Baby Chicks

It is common practice to feed the infertile eggs tested out from the incubator to baby chicks. In so doing it incurs the danger of infecting the chicks with pullorum disease (formerly called bacillary white diarrhea). Where eggs form a part of the chick's diet they should be boiled for at least five minutes and preferably longer. This boiling will destroy the germ of the dreaded chick disease, and then it is perfectly safe and good practice to feed the boiled eggs to baby chicks. One should not run the risk of infecting the brood by feeding the raw eggs.

Cull Young Cockerels

It will pay to separate young cockerels from the pullets when eight to ten weeks old. This will give the pullets a chance for better development, and enable the poultrymen to force the cockerels for market. Time and labor will be saved by hoppers feeding the grain to the growing chicks after five weeks old. Put the grain and mash hoppers out on the range and induce a maximum of exercise. That keeps the chicks out in the sunshine, and this promotes vigor and vitality.

Children CRY for it

It may be the little stomach; it may be the bowels are sluggish. No matter what coats a child's tongue, its a safe and sensible precaution to give a few drops of Castoria. This gentle regulation of the little system soon sets things to rights. A pure vegetable preparation that can't harm a wee infant, but brings quick comfort—even when it is colic, diarrhea, or similar disturbance. And don't forsake Castoria as

the child grows older. If you want to raise boys and girls with strong systems that will ward off constipation, stick to good old Castoria; and give nothing stronger when there's any irregularity except on the advice of a doctor. Castoria is sold in every drugstore, and the genuine always bears Chas. H. Fletcher's signature on the wrapper.

State Navy School Ships

There are only three states in the United States which maintain school ships which train men for the navy. These are Massachusetts, New York and Pennsylvania. Only residents of he state can apply.

Burning Skin Diseases

Quickly relieved and healed by Cole's Carbolic. Leaves no scars. No medicine chest complete without it. 30c and 50c at druggists, or J. W. Cole Co., Rockford, Ill.—Advertisement.

Not Strong on Religion

Gypsies have no well defined religion and frequently adopt the religious customs of the people among whom they live. They attach little importance to religious observances and in some countries are practically pagan.

Some Golf Courses

Nitt—Lost again!
Witt—What—Your golf ball?
Nitt—No—us—Judge.

Any COLD

That cold may lead to something serious, if neglected. The time to do something for it is now. Don't wait until it develops into bronchitis. Take two or three tablets of Bayer Aspirin as soon as you feel a cold coming on. Or as soon as possible after it starts. Bayer Aspirin will head off or relieve the aching and feverish feeling—will stop the headache. And if your throat is affected, dissolve two or three tablets in a quarter-glassful of warm water, and gargle. This quickly soothes a sore throat and reduces inflammation and infection. Read proven directions for neuralgia, for rheumatism and other aches and pains. Genuine Bayer Aspirin is harmless to the heart.

BAYER ASPIRIN

Aspirin is the trade mark of Bayer Manufacture of Monocettedioester of Salicylic acid

FLORESTON SHAMPOO—Ideal for use in connection with Parker's Hair Balm. Makes the hair soft and shiny. 50 cents by mail or at druggists. Hixcox Chemical Works, Patagonia, N. Y.

Peter the Great of Russia at one time issued an edict against beards, and all visitors to Moscow were compulsorily shaved.

Just a shake or two completes the toilet!

Always take time to dust on a little CUTICURA TALCUM as a finishing touch to your toilet. Fragrant and antiseptic, it absorbs excessive perspiration and refreshes and cools the skin, making your toilet complete. You will like it—everybody does.

Have Kidneys Examined By Your Doctor

Take Salts to Wash Kidneys If Back Pains You or Bladder Bothers

Flush your kidneys by drinking a quart of water each day, also take salts occasionally, says a noted authority, who tells us that too much rich food forms acids which almost paralyze the kidneys in their efforts to expel it from the blood. They become sluggish and weaken; then you may suffer with a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To help neutralize these irritating acids, to help cleanse the kidneys and flush out the body's urinous waste, get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate sluggish kidneys; also to neutralize the acids in the system so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive, cannot injure and makes a delightful effervescent lithia-water drink.

Informal Meeting
Managing Director—Have you met our London manager?
Visitor—Very informally—he called me a liar once.

Don't neglect a COLD

DISTRESSING cold in chest or throat—that so often leads to something serious—generally responds to good old Musterole with the first application. Should be more effective if used **once every hour for five hours.**

Working like the trained hands of a masseur, this famous blend of oil of mustard, camphor, menthol and other helpful ingredients brings relief naturally. It penetrates and stimulates blood circulation, helps to draw out infection and pain. Used by millions for 20 years. Recommended by doctors and nurses. Keep Musterole handy—jars and tubes.

To Mothers—Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

Italy Planting Trees

Italian school children planted 1,200,000 trees in 1929, says Arnaldo Mussolini, brother of the duke, who is chairman of the national forestry committee. "Feasts of the forests" were held in 4,325 communities, chiefly those denuded of trees in the World war.

Makes Life Sweeter

Children's stomachs sour, and need an anti-acid. Keep their systems sweet with Phillips Milk of Magnesia! When tongue or breath tells of acid condition—correct it with a spoonful of Phillips. Most men and women have been comforted by this universal sweetener—more mothers should invoke its aid for their children. It is a pleasant thing to take, yet neutralizes more acid than the harsher things too often employed for the purpose. No household should be without it.

Phillips is the genuine, prescription product physicians endorse for general use; the name is important. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

FARM STOCK

ROUND WORMS IN SWINE HARMFUL

Injury Is Often So Great Pigs Never Recover.

The common round worm of swine are known as Ascaris lumbricoides. They are commonly spoken of among veterinarians and parasitologists as Ascarids, but most swine producers speak of them only as round worms of swine.

The large round worms of swine attain a length of as much as 12 inches. The average size ranges from 6 to 12 inches, and these worms are about one-eighth inch in diameter. They are pinkish in color.

When young pigs are very heavily infested with round worms, the larvae (small worms) which find their way to the lungs in large numbers set up a condition of the lungs which is often spoken of as thumps. This is a form of pneumonia and is often severe enough to stunt the pigs to such an extent they never develop properly afterwards. Many of these pigs will linger for several weeks after severe round worm infestation and upon their death or being killed, if the lungs are examined, much evidence of the invasion of the larvae stage of the round worm will be found. The injury is so great with many young pigs that they never entirely recover.

As the worm eggs hatch out in the intestinal tract of the pig, the small larvae are taken up by the blood stream where they go to the liver and then to the lungs, where they remain long enough to set up an inflammation which is often severe enough to develop pneumonia. After a short stay in the lungs, the larvae travel up the trachea or windpipe and are resswallowed and then after finding their way to the intestines of the pig, develop into full size worms. This requires about two and one-half months.

It is estimated that a full-grown female round worm in the intestines of the hog may produce as many as 80,000,000 eggs. From this it is evident how great the contamination of hog yards and quarters must be after a number of worm-infested pigs have been kept in them for several weeks.

The eggs of the round worms are found resistant to very severe weather conditions. As yet it is not known just how long the eggs will remain alive, but it is safe to conclude that the majority of worm eggs will remain alive for more than one year under ordinary farm conditions. Round worm eggs are resistant to many chemicals. This is due to the fact that they are encased in a tough gelatinous membrane or capsule. In order to destroy these round worm eggs, it is necessary to use some caustic material which will dissolve this membrane covering. The best product that we know of for this purpose is concentrated lye which should be used in boiling water—one pound to each ten gallons of boiling water.

Good Pasture Useful in Producing Good Pork

Rape may be sown several times during the season, from May 15 to July 15. In some cases oats is sown with rape, but the reduced yield of pasture does not seem to justify any benefit that may result from this practice. A combination in which oats does work well is with Canadian field peas. Good pasture is secured when a bushel of oats and one and one-half bushels of peas are sown per acre at the normal oat planting time. It yields forage at a time when other crops are short, though it matures quickly, and prompt use must be made of same. The soy bean has use both for pasture and grain in pork production, although the latter's use is much greater. Hogs will graze soy beans, however.

Clean After Cholera

Where cholera has occurred in the herd all quarters which the hogs occupied should be disinfected thoroughly. Liberal use of lime in the small lots will help the natural disinfectant agencies. All litter, rubbish, and refuse should be burned. Buildings should be sprayed with some stock dip. Mud wallows should be drained and filled with fresh earth. The soil under buildings should be sprinkled with quicklime or sprayed with disinfectants.

Hogging Off Crops

For ten years, peas and corn have been grown for hogging-off at the Edgeley substation, North Dakota. The cash returns per acre from the peas range from \$18.65 to \$82.92; corn, \$20 to \$62.64. In four years, returns from peas were not great enough to show a profit; in the other six years the profit ranged from \$1.90 to \$24.28 per acre. The daily gain per hog per pen was from .39 to 1.23 pounds; on corn, 1.23 to 1.7 pounds. In five years peas produced more pork than corn.

Keep Brood Sows

As a general thing when sows get seven years old the number of pigs in the litter becomes smaller and the sow does not do as good a job of suckling her litter as was formerly the case. While this is in general true there are sows which are exceptions in this respect. There is so much variation in sows that as good a rule as any to follow is probably to keep those sows which have been good brood sows as long as they farrow and raise good litters.

Officers of the Best American Cavalry Unit

Left to right: Capt. J. M. Shelton of New Orleans, La.; Lieut. George B. Hudson of Columbus, Ohio, and Lieut. Donald D. Sawtelle of New York city, officers of Troop F, Third cavalry, of Fort Myer. The troop was adjudged the best in the United States and awarded the Goodrich trophy, symbol of the highest rating in the cavalry.

Lone Wolf Is a Genuine American Artist

Here is a native American artist, Lone Wolf, with one of his paintings of a scene on the plains, and a piece of sculpture he is working on. Lone Wolf is from Montana, the grandson of Chief Yellow Wolf, a Blackfeet leader. He has forsaken his beloved plains to work in his studio in New York. As a boy Lone Wolf mixed his own colors from bark, berries and other natural sources. He has never taken a lesson.

WORLD'S CHAMPION

Little three-year-old Marjorie Best smiles demurely as she drags her precious championship cup out upon the diving board at Belleair, Fla. Marjorie has just been acclaimed world's champion swimmer for her age. When but twenty-three months old, she won this Barnes Newberry cup by swimming 25 feet. The cup is competed for annually. The little daughter of Neptune evidently believes in signs, for she has decorated her swimming suit with both a swan and a fish. And she doesn't believe in bobbed hair.

NEW HARVARD PILOT

Charles J. Whiteside, new coach of the Harvard crew, as he watched the varsity oarsmen in their first workout this season. He thinks that an early start on the Charles river will prove beneficial to the crew, which has been working indoors all winter.

Duke of Westminster and His Bride

The duke of Westminster, largest land owner in England, and the new duchess, formerly Miss Loelia Ponsonby, daughter of Sir Frederick Ponsonby, treasurer of the king's household, photographed immediately after the recent marriage.

Italy Saves the Tomb of Virgil

The tomb of Virgil, immortal Latin poet, at Pozzuoli near Naples, was threatened recently as a result of building operations. But the government stepped in and under its supervision the tomb, shown above, was restored and will be preserved.

Many Weddings in Sight

When some girls are already thinking of the wedding ring their health fails, they become nervous, high-strung, irritable, and through this loss of control many a young woman loses her future happiness. As a tonic at this time, and in motherhood or in middle life, there is nothing to equal Dr. Pierce's Favorite Prescription.

One woman said: "I gave Dr. Pierce's Favorite Prescription to my daughter who was backward in development. It helped her to become a healthy woman, instead of a sufferer from inward weakness. I have taken it myself at various times when in need of a tonic and nerve, and have always found it helpful."—Mrs. L. M. Odor, 240 1/2 E. 37th St., Los Angeles, Calif. (Sold by dealers.) Write Dr. Pierce's Clinic, in Buffalo, N. Y., for medical advice, free.

Kill Rats Without Poison
A New Extremist that Won't Kill Livestock, Poultry, Eggs, Cats, or even Baby Chicks
K-R-O can be used about the home, barn or poultry yard with absolute safety as it contains no deadly poison. K-R-O is made of Squill, as recommended by U. S. Dept. of Agriculture, under the Connable process which insures maximum strength. Two cans killed 578 rats at Arkansas State Farm. Hundreds of other testimonials. Sold on a Money-Back Guarantee. Insist upon K-R-O, the original Squill exterminator. All poultry supply, drug, and seed stores—(See Large size four times as much) \$2.00. Direct if dealer cannot supply you. K-R-O Co., Springfield, O.

COULD HARDLY DO HER WORK

Strengthened by Lydia E. Pinkham's Vegetable Compound

Mission, Tex.—"I have used a good deal of your medicine and always find it gives wonderful help. I was feeling so weak and miserable that I had to lie down very often and I could hardly do my housework. I read in the paper how Lydia E. Pinkham's Vegetable Compound had helped other women who were in the same condition so I said I will try it for myself. I am very much better now and I recommend this medicine, and will answer letters from women asking about it."—Mrs. J. W. ALBERTSON, 1015 Miller Avenue, Mission, Texas.

Must Have Been Lively
"So you had a spirited discussion at the Kibitzer club?"
"Yes, all hands joined in."

What some public speakers need is better terminal facilities.

Is Your Rest Disturbed?

Deal Promptly with Kidney Irregularities.

If bothered with bladder irritations, getting up at night and constant backache, don't take chances. Help your kidneys with Doan's Pills. Used for more than 40 years. Endorsed the world over. Sold by dealers everywhere.

50,000 Users Endorse Doan's:
John Greener, 29 N. Sheridan Ave., Indianapolis, Ind., says: "I was troubled with backache. The kidney secretions burned and contained sediment. I felt tired out and had no energy. Doan's Pills put me in good shape and I have used them several times with good results."

LETTING OFF STEAM

Every human being has a right to say what he thinks, and so long as in saying it he does not directly incite others to crime or offend public decency, nobody has a right to stop him from speaking his mind.

That is the sum and substance of our constitutional guarantee of freedom of speech. There is hardly a person living who does not at times yearn for the opportunity to "let off steam" by expressing his opinion of the way the world is run, and of some of the people who have a hand in running it.

A good many people are fanatics on the subject of speaking their mind. They love to attract attention to themselves, and to abuse those in authority. When officials try to suppress them, these vociferous ones are happy. It proves that the world is all wrong. They immediately become, in their own minds and the minds of others like them, martyrs to the cause of free speech.

There is only one intelligent way to handle such people. That is to let them talk, preserve order in the crowd that is listening to them, and pay no attention to what they say. And that is the way in which the communist demonstrations early in March were handled in most American cities and elsewhere in the world.

That didn't suit the communists. There is no glory in being allowed to talk. What they want is to be prevented from talking. That gives them a high degree of satisfaction and gives color to their claim that free speech is not allowed in this country. So when they found, in New York, Chicago and elsewhere, that they were not going to be interfered with, they began to throw things at the police in the effort to provoke retaliation to which they could point as evidence of oppression.

Talking hurts nobody unless the effort is made to suppress it. Like dynamite, these agitators are dangerous only when confined. Give them a chance to let off steam by talking their heads off, if they want to, and the rest of the world will go about its business without bothering them. Try to squelch them and a good many honest but stupid people will begin to wonder whether after all there isn't something in their claim that they are being persecuted. And that is the impression they are trying to convey.

HIGH WAGES REDUCE COSTS

One of the amazing discoveries which has been made in industry in America is that the higher the wages the less cost per unit of production. Almost all of the larger American industries have learned this, but in Europe there has grown up a legend of the American workman as a sort of superhuman, capable of accomplishments far beyond anything the European worker could achieve.

There must be some magic in the air of America, Europeans believed, when they heard of American wage-earners owning automobiles and radios, having bathtubs in their homes, keeping their children in school clear through high school, and having scores of other luxuries which were forever beyond the reach of the worker in the Old World.

They are beginning to learn that there isn't any magic about it. Sir Percival Perry, chairman of the Ford Motor Company, Ltd., which controls all of the European Ford companies, has just issued a report in which he shows that the European worker can do just as much as the American and do it just as cheaply, provided he is paid proportionately as high wages and given as efficient equipment with which to work.

"We are employing Englishmen, Irishmen, Dutchmen, Frenchmen, Belgians, Danes, Germans, Italians, Spaniards, Swedes, Finns and Turks," says Sir Percival, "working in their own countries but doing the same job with similar tools under equal factory conditions. We compare how long it takes each respective man to complete his work."

And what they found out was this. The highest wages are paid in the Danish factory, and there the cost per unit of production was lowest. The lowest wages were paid the Belgian factory, and there the cost per unit was highest. The comparison was exact, for the same things were being made under the same conditions, except in the matter of wages. They raised the wages in the Belgian factory and instantly production costs dropped.

That sort of demonstration is going to revolutionize industry all over the world. The old theory that labor was a commodity to be bought in the cheapest

market has been pretty well exploded in the United States for a decade. Now the rest of the world is learning our secret. That won't hurt us, but will help everybody. Anything which increases the buying power of any people is of benefit to all the other people is of benefit to all the other people who have goods to sell. And prosperity depends upon the interchange of commodities.

Dan Yeager says he don't mind people telling lies about him but if they ever start telling the truth it's going to make him pretty sore.

That New York author who has moved to France because he says America isn't a fit place to live in since prohibition can be added to the list of people who never will be missed.

Just For Fun

A COLUMN OF FUN AND FACTS
By Haliwell & Jones

HOWDY FOLKS—The new Irish shilling has a chicken designed on one side, but the significance isn't just clear. The coin is chicken feed of course, but it isn't the kind of money our chickens have designs on.

PEOPLE TAKING VOYAGES DURING LENT MAY GIVE UP A LOT OF THINGS THEY DIDN'T INTEND TO.

NOW THAT THE TALKIES ARE HERE, MAYBE SOME OF THE EXECUTIVES OF THE MOVIE INDUSTRY WILL BECOME COMEDY STARS.

HICK TOWN
A hick town is a place where the editor can call up central and find out who is visiting the Smiths.

Doakes McBethwater is organizing a company to establish a chain of Vitaphone restaurants, where you can hear and see the soup.

ADVICE TO YOUNG GIRLS
One of the most important problems facing the young lady of today is how to deal with the "masher." These despicable young men, wearing hatbands upon which is printed "chicken inspector," are accustomed to accost unchaperoned lassies and leer, "I love my wife but oh you kid." There is just one way to repulse this type of scamp. With flashing eye and scornful mien, snap back at him, "Twenty-three, skidoo." This will discomfit the rogue, you may be sure. Next week's lesson: "When to call the constable."

Our special this week and every week is **GOODYEAR TIRES**. Come in and let us give you an estimate on a new set of rubber for the family car.

HALIWELL & JONES
OPPOSITE SCHOOLS—PH. 111
Campbell, California

The Letter Box

Editor Campbell Press:
Considerable interest and discussion pro and con throughout the high school district is being indulged in relative to the merits of the two proposed new high school sites, the choice of which will perhaps be determined by a straw ballot at the coming trustee election.

We are informed that 85 per cent of the state taxes are devoted to school purposes. Is our present educational system in point of intellectual and moral attainment measuring up to the tremendous cost of school maintenance? Are the problems being created these times by the abnormal conditions in our country that we are constantly being reminded of from the pulpit, press and public speakers, being solved in sufficient degree insofar as the responsibility of the schools in this direction? If not, heavy expenditures for large school sites and buildings would hardly appear to furnish a remedy.

The idea has been advanced in favor of building a new high school that will meet the needs of the school for say 50 years hence, the economical and safe method, it would seem to me, would be to build according to what we know our needs will be with provisions for extensions as they become necessary. It was thought we were building for the future when the school on Rincon avenue was built and also the present building now in use but we failed in both instances.

It is my belief that present conditions do not warrant the purchasing of a 25 or 35 thousand dollar school site. The present site which also includes the old grammar school site, together with the purchase of additional land for athletic field purposes would meet all the requirements of the school with a two-story modern equipped school building constructed to meet the needs of future extensions as they become necessary.

We had considerable difficulty in getting a high school started here. At the time our late Ex-President Roosevelt honored this community by stopping here and planting a redwood tree on the high school grounds, and closing the ceremonies with very fitting remarks on behalf of the high school, no one at that time thought that the high school would ever be located in any other place. This incident, and in memory of our late first principal, Prof. J. Fred Smith, should be some inducement at least to retain the present site. Much of the significance attached to the event above mentioned would become lost if the school should become located elsewhere.

ODD FELLOWS AT CUPERTINO MON.

Members of the Morning Light lodge, No. 42, I. O. O. F., of Campbell, journeyed to Cupertino Monday night for the monthly visitation of Odd Fellow lodges held with the Cupertino subordinate.

This movement, started as a district feature, has now spread to such an interdistrict magnitude that lodges from San Francisco and all other bay cities to as far south as Redlands are represented at these meetings. Cupertino furnished a very pleasant evening and the progress of the order in general was shown to be at its best, according to local Odd Fellows.

San Jose Kiwanis To Furnish Program

Tuesday noon, April 1, is guest day for the Campbell Kiwanis club and a number of friends will join in the enjoyments of the peppy program that will be furnished by the San Jose club.

The local club is still 100 per cent in its attendance for the intensive campaign and all members are urged to keep it that way.

Chairman Jim Dempsey is busy shaping up the big card party for Saturday night and a bunch of prizes are in store for big scores.

Hugo and Edward Ehret, who have been visiting with friends and relatives in Campbell for the past several weeks left for their home in Belleville, Ill., Thursday.

Mrs. Edith Turner was visiting in Santa Cruz last week with her parents, Mr. and Mrs. A. C. Blood.

Windsor and Cecil Cutting, Bernard Robson, Harold Cramer, Albert Turner and Thomas Lumb, are home for a week's vacation during a rest for the students of Stanford between quarters.

An all-day meeting of the Women's auxiliary of the Orchard City Grange was held at the home of Mrs. S. N. Hedegard Thursday, March 20. A basket luncheon was served at noon.

Mr. and Mrs. Warren McKenzie of Richmond were visiting with Mr. and Mrs. J. H. Campbell last week.

The Ladies Aid society of the Methodist church met with Mrs. C. C. Byrnes Thursday, March 20. All business at hand was taken care of.

The summer division of the Congregational Guild will meet Thursday at 2 o'clock with Mrs. Ted Gail at her apartment over the Peter Pan Bakery.

and the old buildings form part of the grammar school, the needs of which can be otherwise provided for.

A TAXPAYER.

CAMPBELL TRIMS BERRYESSA NINE

Local fans were treated to real baseball Sunday when the local team defeated Berryessa 7-4. A good crowd was on hand to see the game.

The locals scored in the first inning, while their opponents did not score until the seventh frame.

Boland of Berryessa lined out the only homer of the day with no one on bases. Boro walked seven players, Palmer for Campbell walked three, hits off Boro five, off Boland three, off Palmer eight. Double plays—Berryessa, Boland, Felice, Thomas, Campbell, George Frank to Lanotti to P. Frank.

GUNMAN'S BLUFF

By **Edgar Wallace**

COPYRIGHT BY EDGAR WALLACE

TENTH INSTALLMENT

She was stunned, bewildered; she could only shake her head in feeble protest.

"It couldn't have been the same man," she said at last.

"Do you know him—the fellow who was here?" The detective looked at her keenly.

"No, no," she said hastily. "I only thought... it would be such an extraordinary coincidence."

"I've got an idea Mr. Gorton knows him." The detective shut the door behind her as she walked out of the room. "I heard him telling the sergeant that he might be the fellow who was knifed the night a man named Lewing was killed. If that's the case, he's only been out of the hospital a few days."

She offered the officer some money; he refused it with great firmness and escorted her to her taxi. She was reminded by the fare, when she reached her house, that she had been two hours absent.

She was not shocked; it was too tremendous a discovery to produce emotional phenomena of the commonplace kind. She accepted Luke Maddison, banker, burglar, holdup

people. She trusted him—she had trusted Danty. She had believed him implicitly, believed him when he told her that Luke had hounded her brother to his death, believed him when he had produced that pitiable note written on two small sheets of notepaper—that at least was genuine, for she knew her brother's writing.

She was viewing a new world, or viewing it from a new angle; and somehow she was able to cope with problems which the day before would have terrified her. Of that new gift she was unconscious—she could only feel the effect.

During the hours which Luke Maddison had spent in his prison house, it was curious that he should think so little on serious topics. He was face to face with death in its most hideous aspect—it was impossible to mistake Connor's intention—and yet for the main part his mind was occupied by the veriest trivialities. If he thought of Margaret at all it was only in a detached and impersonal way and to find an explanation for her presence with the police at his flat that night. She must have had the key; the police went to her—

of the two walked to the door and pulled it open.

Connor saw him start back and his face wrinkle.

"Who's that?" he asked sharply.

The man who was in the passage walked into the room at his leisure. Connor saw him and showed his teeth like an angry dog.

"Hello, Gunner! What the hell are you doing here?"

Gunner Haynes looked from Connor to the unconscious man on the floor.

"Ingenious but not original," he drawled, his thin lips curling in contempt. "You're dropping him in the river, of course, and the water will dissolve the salt, the chains will fall off, and the verdict will be 'death from misadventure.' What a pity!"

"What's the pity, Gunner?" asked Connor.

"That I happened to butt in," said Haynes. "Who's the victim?"

"There's no victim," said Connor loudly. "This poor fellow is ill and we're taking him to the hospital."

The Gunner nodded. "I thought you might be pickling him," he said, shook his head and repeated: "Ingenious but not original. No marks of violence on the body, nothing to show that he did not drown, as people do drown, by accident. I'm sorry to have spoiled your amusement, but you'll have to let him go."

"Why?" asked Connor.

"Because," said the Gunner deliberately, "I'm in it! You don't catch me as accessory before, after or in the fact of murder. It's not my graft, Connor. Remove that interesting apparatus."

Connor smiled. His hand dropped quite naturally out of sight below the level of the table.

"If you pull a gun on me," said the Gunner, not a muscle of his lean body moving, "I shall shoot you through the stomach. It'll take you five days to die, and it's a very painful death by all accounts. I shall then go out and tell the police why I shot you, and there will be no flowers from Scotland Yard."

One of Connor's assistants moved a step toward him.

"Look here, Gunner—" he began, mildly enough.

Haynes' fist shot out so swiftly that the man could not counter the blow. He went down with a crash. The Gunner stood motionless, watching.

"Both hands in sight," said Haynes. "Lay 'em on the table, Connor."

He had no weapon in his hand, but none knew better than the livid man on the other side of the table how quickly the Gunner could draw, with what devilish accuracy he could shoot.

What's the fuss?" he growled.

"This bird doesn't mean a thing

to you."

"Unlace him," smiled the Gunner. "I'm sorry to butt in, as I said before."

"What did you come here for, anyway?" asked the other savagely.

The Gunner looked up at the ceiling.

"I forget exactly," he said untruthfully. And then: "Who is the man?"

"Man named Smith. He squealed on me tonight, and then tried to carry it off with a tale about being a banker—he's got a nerve! Luke something or other."

Gunner Haynes bent down and peered into Luke's face.

He recognized the sleeping man instantly.

"Luke something or other, eh? Where did you pick him up?" As he spoke he beckoned one of the men. "Take that chain off," he said.

The man glanced uneasily at his chief, but Connor nodded.

"The trouble with you, Gunner, is that you will interfere with other people's graft. If you want to know who he is, he did that job today in Bond street."

He related "Smith's" biography: Gunner Haynes knew that he was speaking the truth. He was puzzled, but not greatly. He had lived too long on the seamy side of life to be surprised at anything. Men had lived double lives before; but this was the kind of double life which Haynes thought belonged to the realm of imaginative novelists. A banker who amused himself in smash-and-grabs was wildly fictional—but possible.

There might be, he thought, a woman somewhere in the background. Where women touched life, the inexplicable became almost daylight-clear.

"What are you going to do with him?" asked Connor, as the man stooped and with scarcely an effort lifted the unconscious Luke onto the chair.

The Gunner did not answer the question. Instead, he propounded one of his own.

"Have you any slush in this place?" he asked and saw a look of alarm come into the imperturbable face of the other.

"Slush?" said Connor quickly. "No—why should we? I don't deal in that kind of stuff."

"No forged French banknotes?" The Gunner shook his head in anticipation of the answer.

"What do you mean, Gunner?"

A smile lit up the saturnine face. "You asked me why I came here, and I'm telling you. They're raiding your place tonight. I only got to know it an hour ago. I thought I'd come along and tell you. I don't know why, but that's my nature—helping poor crooks!"

He saw the three men glance at one another, and the alarm in Connor's face was patent.

"We had a parcel over from Paris the other day," he said un- easily. "Harry, get it up."

He looked at the huddled figure of Luke.

"You're making a big mistake about this bird," he said. "You let him get into the hands of the police and he'll put up a squeal that will make you deaf!"

Stooping, the Gunner put his arm about Luke Maddison and lifted him bodily. He turned and strode through the door, down the narrow passage and into the untidy yard. He had already located Connor's van, and he was on the point of hoisting his burden into its interior when he heard a stealthy scuffling against wood. It was the sound that a man makes when he is climbing—somebody was getting over the gate.

He sat Luke on the ground, propped him against a wall, and went noiselessly toward the entrance of the yard. Stooping to get a skyline, he saw the head and shoulders of two men above the gate. It was enough; he need see no more.

man, companion of questionable ladies, with the calmness of a scientist who had happened upon a new and interesting discovery.

Here was an immense happening. To display anger or humiliation would be absurd. One has no regard for a sense of decency when fleeing from an earthquake and its tumbling walls.

She went to bed; and such is the serenity of a resolute mind that she slept dreamlessly. In the morning while she was sitting at breakfast came Inspector Gorton; she listened calmly to his confession of failure.

"The fellow ran like a hare. He must have been a trained athlete," he said. "I'm pretty sure now that he is the fellow who was knifed in a gang fight in South London. Lewing was killed."

"Who was Lewing?" she asked. Gorton shrugged his broad shoulders.

"Nobody in particular, although he gave his name to a gang. The real leader of that crowd is a gentleman named Danty Morell—though he hasn't taken any very active..."

She put down her cup. He saw how white her face was.

"Danty Morell? You don't mean Mr. Danton Morell who lives in Half Moon street?"

Gorton smiled.

"Perhaps I oughtn't to have said that, but I thought Mr. Bird had told you. You know Mr. Bird? I hope you don't know Mr. Morell!"

"I know him very well," she said; her voice was steady and she was smiling. "But you may rely on my discretion, Inspector—I feel almost like a Scotland Yard officer myself."

She had her hands folded in her lap so that she could not see how they were trembling.

"He may, of course, have turned over a new leaf," said Gorton, uneasily conscious that he had said the wrong thing. "Some of those fellows do. I know there's been no complaint against him at the Yard for a very long time. Morell isn't his name, of course—I forget what it was, but the Sparrow—I mean Mr. Bird knows. Wonderful fellow, Danty! He can talk the hind leg off a donkey. They say he's the cleverest confidence man that ever operated in Europe. Perhaps he's made enough money to retire."

Danty Morell! How had she come to know him? She tried to trace back the friendship. Of course, it was her brother—her poor brother—who had introduced him. Rex knew so many queer

but why?

Two blocks of rock salt were put on the floor under Luke's legs, and with a knife one of the men scooped a deep impression in two of the corners. Two other blocks were laid on top. Connor lifted the heavy chain, wound it carefully around and around the salt, fastening the last two links with a piece of wire.

They discussed their grisly work without emotion.

"... You want to be careful it don't slip over his feet, Harry," said Connor. "Tighten that chain a bit—not too tight or you'll break the salt."

At last it was finished and Connor straightened his back.

"Get that old plank to lay him on," he commanded, and the bigger

GROWING MONEY

Spring is the time of new life. In the freshly cultivated fields are new green shoots...in the orchards fruit trees are in blossom.

Money may be planted too... and an interest harvest gathered. Sow the seed now. Start an American Trust savings account...give it nourishment by saving regularly and watch it grow.

If you already have a savings account with this bank, why not determine to give it new life as well, by making regular deposits each week or month.

CHAPTER XII—Continued

—14—

"Done the same, myself, in your place. Humph! But I couldn't very well help floggin' you, y'know. Discipline, and all that sort of thing."

"You needn't have pressed me," asserted Fellowes, recovering a sense of injustice.

Collishawe frowned again. There were tiny beads of sweat on his forehead, and his gaunt cheeks grew gaunter.

"Ain't sure," he answered. "Couldn't help myself, though. That swine Chater. Swore you were a British subject, said any way 'twould be dangerous to let you get into New York—you'd talk about the True Bounty meetin' us."

Fellowes rocked on his heels, eyes shut, an awful nausea possessing him.

"There wasn't—anyone else?" he asked dully.

"Eh? Anyone—?" A shrewd light flickered in Collishawe's fever-bright eyes. "Oh, Miss Inglepin? No, she knew nothin' of it. Matter of fact, I've thought since, Chater hooked me deliberately while she was away. Kind of thing the cursed swine would do, y'know."

"I'm sorry," Fellowes said.

Collishawe's jaws contracted somewhat, his first real sign of emotion.

"Done the same in your place," he repeated. "I've thought a lot about it. Funny how a feller gets things twisted, eh?"

He caught his breath.

"Pain?" Fellowes exclaimed quickly.

"Yes-es. Think you could get me—bit of rum?"

A sailor brought a pannikin on the run, and Collishawe lapped it eagerly while Fellowes supported his head.

"That's—better," he said in the crisp, impersonal tones habitual with him. "Y'know I've often thought about that time—floggin' you, and all. Bothered me. But I can't see how I could have let you off."

There was a new humbleness in Fellowes' heart.

"I expect you couldn't have," he admitted.

"Sportin' of you to say so. But I'd have felt just as you did if you'd flogged me. Some things a feller can't forgive."

"Why can't we forgive?" cried Fellowes. "Why should we go through life hating people?"

"Not a preacher—can't say. But any feller'd hate a feller flogged him, especially if he felt there was a dirty play behind it. A streak of passion warmed Collishawe's tone. "What I can't go is havin' a rat like Chater start all this. D—n his soul! If I find him in hell—"

"He's dead," Fellowes blurted out.

"Dead? You mean the True Bounty?"

A tremor convulsed Collishawe, and once more the ominous trickle or red seeped through his bandages.

"Miss Inglepin? She—you mean they went down?"

"No, the True Bounty is sunk; but Miss Inglepin—"

"I'm here," Cara's voice panted. "Oh, where is she? Where is James?"

The stolid ring of sailors was burst asunder as if Cuffee's Big Serpent had been discharged into their midst, and Cara flattered down beside Collishawe.

"James! What have they done to you? Oh, Father, Father, please fetch Doctor O'Shaughnessy."

"No use," said Collishawe. With an effort that was effortful, he raised a hand in Cara's direction, and both hers closed around it. "Gone. But no hard feelin'—eh, Fellowes?"

Fellowes owed his head, heart-sick. For Cara, he saw, he didn't exist.

"But there must be something to do," she was saying in a strained voice, tears streaking her cheeks. "Do let me see!"

Collishawe tightened his grasp of her hand, and in response to the effort the trickle that flowed from his bandages became a stream.

"No, no," he denied faintly. "Don't!"

And she saw, as Fellowes did, the gray shadow that mantled his face. She must have seen something, too. In the fading eyes that Fellowes did not see, for she bent swiftly, and her lips touched his.

"Worth everything," he murmured, smiling.

For a breath the shadow lifted from his face. The light blazed in his eyes again.

"Nail up that flag, damme!" he cried. "You'll not strike whilst I'm—"

Fellowes stooped and caught the poor, mangled clay as it slipped sideways. His shoulder chanced to touch Cara's, and she drew back with an instinctive aversion that blighted his self-rejoice.

"This is the fruit of hate," she said in a hard, still voice. "But death is better than some things—yes, better than living in hate. Oh, sir, if you might know how I—how I despise you!"

She fumbled in her bosom, and produced a clean kerchief, which

she spread over Collishawe's wan face.

"Come, Father," she said—and oh, how wearily! "We should try to help James' men."

Fellowes wanted desperately to speak to her, to comfort her, to excuse himself; but the words wouldn't come—a sense within himself informed him her mind was closed to him. Her mind and her heart. So much for victory!

CHAPTER XIII

Doubt.

THE Badger was sinking to the booming of the Centurion's minute guns, sinking with the sun that had draped a crimson curtain across the portals of the west. Aft, under the break of the poop, a carronade was made fast to ringbolts, square amidships, and on top of it was lashed the bundle of salletcloth that held Collishawe's body. The Englishman rested where he had died, and from the stump of the mizzen still floated the flag he had ordered nailed there, one corner torn by a roundshot.

The sloop-of-war reared up, struggling to keep her bow above water; but presently she sagged forward, and this time she failed to recover herself. Her fore'sle commenced to slant. Masses of green water surged through the forward ports, and she started to slide under as if she was coasting down a hill that grew steeper and steeper. Waves licked at the bundle on the carronade, submerged it, slapped the poop railing—and her stern canted high in air, the White Ensign at the mizzen standing out straight in the breeze as it was engulfed.

The last minute gun boomed, and Fellowes launched a crisp stream of orders almost before the echoes had died away, none but himself aware that he must have something to divert his mind or else go mad.

Cara Inglepin ignored the resumption of discipline's sway. Her gaze remained fixed on the swirl of wreckage that marked the spot where the Badger had disappeared. But presently, as the brig forged ahead, the litter of spars and deck fittings dwindled to insignificance, and she became aware of the orderly hum of activities around her—and of her father.

"Do you suppose I might speak to Captain Fellowes?"

"Is it wise, Cara?" her father asked. "I am bound to admit Fellowes has been civil, but I think we do well to avoid him as much as possible. And I'll not have him suspecting us of pleading for mercy."

She laid a caressing palm on Ben Inglepin's face, which was neither so plump nor so rubicund as it had been, after a day's toll in a stuffy cockpit that presented one endless succession of horrors.

"I owe him an apology, Father," she explained simply. "And I must thank him."

"Thank him?"

"For his generosity. It was noble."

"He's generous and noble enough to see that we are by way of being hanged."

Ben Inglepin retorted disagreeably.

"You're unfair, Father." Her lips some figure straightened. "If we merit to be hanged, shall we complain of him? We knew the risks we must encounter. And if a stake such as ours is worth playing for, worth winning, 'tis worth losing a life for."

There was nothing circuitous or indirect in the expression with which Ben Inglepin regarded his daughter.

"Ah, lass, you shame me. Egad, you do!" He stooped and kissed her.

"Speak to Fellowes. He's a gentleman, I'll own, and a bulldog, if there ever was one. Chater and—"

"Well say nothing of Chater, Father," she interrupted. "Twould have been better for us had we not sold our case by contact with him."

"Oh, my dear! Don't be hard on Saul. He wasn't choice, I'll grant you, but in his way he helped—"

"Ah, no, he ruined us! But for him Captain Fellowes would not have been pressed. And if—but this is to no purpose. Go below, and see if you can help poor, fat Maria. I'll be with you soon."

"Stay on deck, poppet, and win some color to your cheeks," Ben counseled. "The senora and I can manage."

Fellowes was staring out over the stern—at the same distant spot, which so recently had monopolized Cara's attention, when the girl approached.

"Oh, Miss Inglepin, we—we are indebted to you. To you and your father and your—ah—duenna. Very helpful, Doctor O'Shaughnessy tells me. We should have been badly off without you—the Badger's wounded and everything."

"We were glad to do it, sir," she returned. "But I came to thank you. 'Twas knightly of you—to bury him so—with his flag flying. And I am sorry for what I said this afternoon."

He flushed brick-red.

"'Twas the truth," he muttered. "I have much to answer for. He

running short of water and food after a six months' cruise, Fellowes was relieved when a wet Easter sent the blockaders scurrying off shore, and the Centurion could venture a landfall. They stood out from the Rockways, following the Badger had paroled, and on the verge of darkness sighted the spot of Sandy Hook and came to anchor for the night under the guns of the forts. They were anel A fat cruise, every one agreed. The prizes should yield \$100,000, at the lowest computation and allowing for the loss of one of the three sent in, what with the gold in the Centurion's strong box and the choicer bits of cargo stowed in the hold. And that meant some \$350 in prize money for every seaman.

Of all the crew, Fellowes, alone, was moody, and received indifferently the congratulations of visitors. By his instructions, nothing was said of the capture of the True Bounty, and the Inglepins and their attendant were confined in the after-cabin. They were Joshua's personal share of this spoil, he re-flected cynically, they and the tid-bit of treason that went with them, and Joshua should be the first to gloat over their humiliation and shame. He'd have nothing to do with it after discharging his duty. Surrender them, give his report—and go. Where? Anywhere there was fighting.

He abandoned his reflections when the Inglepins came on deck, the duenna, wrapped in her funeral garments, clinging to Cara like a shadow. Both Ben and his daughter looked like people who have shut the past from their minds, who front the future unafraid. Ben nodded pleasantly to Fellowes.

And Cara folded him in one of those compassionate glances which made him writhe inwardly. Why should she pity him? He wanted none of her pity. And annoyed, self-conscious, his expression became wooden and taciturn as he responded to their greetings.

Nozzle had the longest hoisted out. In addition to the oarsmen, Fellowes detailed an armed escort, consisting of Sophy, Eeches, Doak, Cuffee, and Tom, and when they had taken their places he asked the Inglepins to follow them. The duenna was lowered in a lubber seat. Her vast bulk could never have accommodated itself to the Jacob's ladder. And last, he went overside himself, precisely dressed in a fresh uniform, sword and pistols at his belt, the compromising petition Cuffee had found in the True Bounty's anchor-stock folded up in his breast pocket.

His hand crept toward the pocket, rested on his coat-lapel. He toyed with the thought of wrenching the document from its hiding place and casting it into the East river. But Cara's eyes were on him, steady eyes, pitying eyes, and head and hand dropped together. Had she read his purpose? Or was that but fancy, too?

"Faster, men," he urged the rowers hoarsely.

It was only six months since the True Bounty and Centurion had sailed, and the waterfront remembered the gossip that linked the two vessels. And here was Ben Inglepin returning in Joshua Inglepin's brig, with an armed escort in attendance. Cara, her hand on her father's arm, waved to an occasional acquaintance, smiling frankly. The duenna was a shapeless mass, waddling after them. Nimrod Sophy, very important, strode in front. Doak and Eeches marched behind him, and Tom and Cuffee immediately behind the Inglepins and the duenna. Fellowes brought up the rear, denying the requests for information which were showered upon him as the word spread along the docks—"Hey, the Centurion's in! They got Ben Inglepin in his gal."

Merchants and shopkeepers, bucksters and peddlers, sailors and milltamen, boys, and girls, market women, housewives, maid servants, eddied toward Front street. Far in the rear a brace of fat watchmen hobbled anxiously, inquiring of every one they met what had happened. In Front street they had an answer:

"Ben Inglepin's in Joshua's office. Joshua's, I tell ye . . . No, no, not his'n. 'Ain't nobody thar . . . No, ye can't git in. Joshua's privatesmen won't let ye."

But the watchmen persisted and forced their way to the doorstep.

At that moment Fellowes emerged from the doorway of Joshua Inglepin's office, and the grim, set expression of his features, the competent poise of his lean body, caught the attention of the nearer bystanders. Men craned on tiptoe to catch the few words he spoke.

"You two are watchmen? Then one of you is to go to Government house, and inform Governor Tompkins, with Mr. Joshua Inglepin's compliments, that the Centurion privateer is in, and Mr. Inglepin will be obliged if his excellency will attend here to examine certain matters of importance."

A dozen voices hailed Fellowes. "What's toward, sir?" "Are the British coming in?" "Will they engage the forts?"

"I have no information of that character, gentlemen," Fellowes answered. "As a matter of fact, the blockading squadron was driven offshore by the recent storm."

"Did ye have a good cruise?" called a different group. And one deep voice roared: "What happened to yer foretopmast?"

"We lost it in action with the Badger sloop-of-war," Fellowes returned. And sending the abrupt tension produced by the statement, went on: "It may interest you to know that we sunk her. We have the survivors of her crew aboard, and among other things I must consult the governor as to their disposition."

A cheer that was almost hysterical acclaimed the news.

(TO BE CONTINUED)

Don't do the same in your place," he repeated.

told me—Collishawe told me—'twas Chater persuaded him to press me—not you. I owe you an apology. I wasn't quite—"

"But how could you have been? You were dreadfully wronged, and none the less because 'twas all a tissue of mischance."

"'Tis an evil passion, this hate," Fellowes insisted. "Vexation and sorrow—and death—it has brought to all who crossed my path."

"You exaggerate, sir," she answered soberly. "Surely, 'twas not evil to slay Captain Chater, who would have slain you. And James was your enemy in war. If he must have died, he'd rather have died so."

"Are you to become my advocate?" he cried, exasperated—the other officers glanced at him askance. "Well, then, give me an argument in justification of delivering you to Joshua Inglepin's hatred!"

"'Tis unnecessary I should argue with you to do your duty," she replied as soberly as before. "You set your hand to this task. Will you draw back from it?"

"God knows! I—?" He was on the point of saying: "I love you! How can I send you to a cell in the Bridewell, a gibbet on the South-west battery?" When he realized the bare fact he loved her must make him implacable. In honor, he could not favor her. And if he possessed any lingering shreds of pride, he adured himself in a hot burst of fury, he'd remember she had accepted Collishawe after lighting troth with him.

"I have got myself into this coil," he concluded, strangling his emotion. "'Tis for me to work myself free. But I'd have you know, m'am, I gain no satisfaction from it."

"How could you, who are not cruel?" she answered tranquilly. "Come, Cuffee, you can aid me shift the wounded men for their ease."

.....

Burdened with prisoners and

Stories of Giants Proved Mythical

If a man were sixty feet high he couldn't walk. That is, he couldn't walk without breaking his thigh bones, which will support only about ten times one's weight without breaking.

If you multiply one's height, width and thickness, each by ten, the total weight will be multiplied by a thousand, but the cross-section of each bone is multiplied only by a hundred, so that each bone has to carry ten times as much strain as in the normal individual.

That is the ingenious way in which J. B. S. Haldane, famous English biologist, disposes of the giants of folklore and myth, writes Karl Vought in Popular Science Monthly. They couldn't have existed and remained human. If they were shaped differently they weren't human, and they would have had to be shaped differently to have lived.

It is easy to imagine an insect the size of a man, for example, but such insects not only do not exist but cannot exist. Insects absorb oxygen through their skin or shells instead of breathing through lungs. Multiply the mass of a grasshopper by a thousand—that is

make it ten times as large as each dimension—and you have only increased its service of skin area by a hundred. To support life it will have to absorb oxygen ten times as readily through its skin as it actually does or can.

The surface area of any body does not increase with the body's weight or mass. A man stepping out of his bath brings with him a film of water of a definite thickness, weighing only about a pound. A mouse falling into a pan of milk is covered with a film of the same thickness, but which weighs almost as much as the mouse itself. Insects getting only part of their body wet are helpless. Watch a fly that has been submerged in water. It cannot fly until it has dried off.

Wood for Toothpicks

White birch is used most extensively for the making of toothpicks. The seat of the industry is in Maine, but some are imported from Japan and Portugal. The Portuguese toothpicks are made of orange wood and are smaller and tougher. Those from Japan are made from fine reeds.

Oklahoma Girl Strong as Boy

"Louise Alice was fretful, nervous and all run-down from whooping cough," says Mrs. F. J. Kolar, 1730 West 22nd St., Oklahoma City, Okla. "The little I could force her to eat wouldn't ever digest. She became underweight, sallow and weak. Then I decided to try California Fig Syrup, and the results surprised me. Her bowels started working immediately, and in little or no time she was eating so she got to be a pest at the table, always asking us to pass things. Her weight increased, her color improved and she began to romp and play again like other children. Now she's the picture of health, and strong as a boy."

Pleasant-tasting, purely vegetable California Fig Syrup acts surely and quickly to cleanse your child's stomach and bowels of the souring waste that is keeping her half-sick, bilious, sallow, feverish, listless, weak and puny. But it's more than a laxative. It tones and strengthens the stomach and bowels so these organs continue to act normally, of their own accord.

Over four million bottles used a year shows its popularity. Ask for it by the full name, "California Fig Syrup," so you'll get the genuine endorsed by physicians for 50 years.

All in One Day

The unique circumstance of becoming simultaneously a mother, a grandmother, and a great-grandmother occurred to a woman in Hungary. According to the newspaper, Vasvarmegye, the woman—who is an elderly peasant—her daughter, and her granddaughter had each given birth to a son on the same day.

Millions now use Russ Ball Blue. Makes clothes snowy white. Get the genuine—Adv.

Finds Youth's Fountain!

"JUST one thing has contributed more than anything else in my life toward making me the radiant happy woman I am today," writes Mrs. Walter Ruehl, of Glenbrook, Conn. "If this was selling at ten dollars a bottle instead of the few cents it costs, I would scrape the money together, and I don't mean maybe!"

"I guess a good many others feel the same way, judging by the number of people I know who swear by this 'Fountain of Youth.'"

Millions of people all over the world have discovered this simple secret, which is nothing but giving our bodies the internal lubrication that they need, as much as any machine. After you have taken Nujol for a few days, and have proved to yourself how it brightens your whole life, you will wonder how so simple a treatment can make such a great change in your health and your happiness. The reason is this:

Regularly as clock work, Nujol clears out of our bodies those poisons (we all have them) which slow us up, make us headachy, low in our minds.

Colorless and tasteless as pure water, Nujol cannot hurt you, no

A snake knows who its enemies are. That is why it bites man.

HEALTHFUL LIVING

"An ounce of prevention is worth a pound of cure"—literally this ancient proverb is true today. The average family spends for CURES about sixteen times what it should spend for PREVENTION.

Periodical Physical Examination is gaining approval rapidly so far as the schools and children are concerned.

BUT physical examination is the EXCEPTION rather than the rule, for ADULTS.

Periodical medical examination discloses defects or conditions needing attention in one out of every four persons, and at least HALF of these are readily preventable!

Our chances of life can be increased 25 per cent and more by yearly examinations and by following the advice of a competent physician.

REMEMBER, our doctor would sooner help us KEEP WELL than try to cure us when we are sick.

If we treated our bodies as well as our cars, the health, prosperity and happiness of our community would be pyramided.

We must remember cities made up of healthy citizens are PROSPEROUS CITIES. Our community wealth is dependent on personal health.

LET'S ALL LIVE HEALTHY, HAPPY LIVES!

Practically every business and professional man is actively engaged in supplying a commodity or service which contributes directly or indirectly to your health, and as such he is working to keep you and every other citizen healthy and happy in

F. W. Mitchell, clerk
High School Board.

Dated Feb. 26, 1930.
(26-27-28-29)

NOTICE OF TRUSTEE'S SALE
No. 3807

NOTICE IS HEREBY GIVEN:
That default has been made in the
payment of the sums agreed to be
paid under the contract secured
by that certain deed of trust ex-
ecuted by Phineas Pomeroy and
Catherine Pomeroy, his wife, as
trustors, to Edith G. Brown and
F. L. Johnston, as trustees, and
San Jose Building and Loan Asso-
ciation, a corporation, as benefi-
ciary, dated February 7, 1927 and
recorded February 11, 1927 in Vol-
ume 294 of Official Records, page
376, Records of Santa Clara
County, California:

AND WHEREAS the San Jose
Building and Loan Association, the
beneficiary under said deed of
trust did on the 25th day of Nov-
ember, 1929 record in the office of
the County Recorder of the County
of Santa Clara, State of California,
a notice of such default and of its
election to cause the property cov-
ered by and described in said deed
of trust to be sold to satisfy said
obligation secured by said deed of
trust, which notice is of record in
Volume 488 of Official Records,
page 386, Santa Clara County
Records:

And more than three months
having expired since the recording
of said notice:

AND WHEREAS said San Jose
Building and Loan Association, a
corporation, beneficiary under said
deed of trust, pursuant to its
terms, has requested in writing
that F. L. Johnston, one of said
trustees, act alone for and as the
act of both trustees, and execute
the trusts as by said deed of trust
provided:

And application in writing hav-
ing been made to the undersigned
as trustee under said deed of trust
by the San Jose Building and Loan
Association, a corporation, the owner
and holder of said contract and
deed of trust securing the same,
that the said undersigned F. L.
Johnston, as trustee under said
deed of trust act alone and as the
act of both trustees, and sell the
premises by said deed of trust cov-
ered and hereinafter described,
as by said deed of trust provided:

NOW THEREFORE the under-
signed trustee will on Wednesday
the 2nd day of April, 1930, at the
hour of 10:00 o'clock A. M. of that
day, at the front door of the County
Court House in the City of San
Jose, County of Santa Clara, State
of California, in pursuance of the
provisions of said deed of trust,
sell at public auction to the highest
bidder for cash in United States
gold coin, the land and premises
situate in the County of Santa
Clara, State of California, de-
scribed as follows, viz:

Lot No. 17 of the Strom Subdi-
vision in the Town of Campbell,
according to a map of said Subdi-
vision of record in the office of the
County Recorder of the County of
Santa Clara, State of California, in
Book 0 of Maps, page 12, Records
of said county.

Subject to all taxes levied or as-
sessed against said property.

Terms of sale cash in United
States gold coin, ten per cent pay-
able at time of sale, balance on de-
livery of deed, and if not so paid,
unless on account of defective title,
said ten per cent to be forfeited
and sale to be void. Acts of sale
at purchaser's expense.

Dated March 8th, 1930.
F. L. JOHNSTON,
(27-28-29-30) Trustee.

NOTICE OF ELECTION
Notice is hereby given that an
election will be held by the voters
of the Campbell Fire District,
(bounded and described by that
certain instrument filed on the
20th day of February, 1918, in the
office of the County Recorder of
Santa Clara County at San Jose,
California), on the seventh day of
April, 1930, at the Campbell Fire
House, for the purpose of electing
one commissioner to serve for the
period of a three-year term.

Polls open at 12 M., and close at
5 p. m.

R. W. Kennedy, E. E. Weeks and
L. M. Beall, Judges.
E. C. MERRILL,
W. H. STRAY,
HORACE LEA,
Board of Fire Commissioners of
the Town of Campbell. (27-8-9)

**NOTICE OF ELECTION FOR
ELEMENTARY SCHOOL
TRUSTEE**
(Section 2,892, School Code)

NOTICE is hereby given to the
Electors of Campbell Elementary
School District of Santa Clara
County, California, that the An-
nual Election for School Trustee
will be held on March 28, 1930 (last
Friday), at Campbell Union Gram-
mar School.

There will be two trustees to
elect for three years.

The polls will be open between
the hours of one o'clock p. m. and
six o'clock p. m.

The officers appointed to conduct
the election are:
Mr. Guy Farley, Inspector.
Mrs. Dora Ross, Judge.
Mrs. Edith Barker, Judge.

Signed:
WALTER I. MERRILL,
Clerk.
Campbell Elementary School
District.
Dated February 25, 1930.

**Campbell Union High
School Notes**

Miss Elizabeth Thomas, instruc-
tor of Spanish, will speak to the
Girls' league Thursday, March 27,
about her experiences in Spain.

—CUHS—

Los Gatos has invited the Cam-
pbell girls to a tennis play-day Ap-
ril 5. Campbell is sending doubles
listed as A, B and C; A being high-
est, B the next and C the amateurs.

—CUHS—

The annual junior-senior recep-
tion will be given June 6.

—CUHS—

IN MEMORY OF

HAROLD DENCKNER
The flag is at half mast and the
student body, especially the Junior
class, is sad because of the sudden
death of their loved fellow student,
Harold Denckner. Always patient,
humorous, generous to everyone,
suffering without complaint, a good
sport every time, the quiet, gentle-
manly boy was liked by everyone.

Regardless of his suffering Fri-
day he joked freely and the teach-
ers report that his work is com-
plete up to Friday night. Friday
evening after school he went with
some friends for a ride and when
he got home he had a slight fever
and during the night became very
ill. He lay in a coma for three days
and passed away Monday morning.

Harold lived in Willow Glen with
his parents and had attended the
high school in Campbell for three
years.

—CUHS—

The students who wish to attend
the funeral will be taken by the
high school busses Wednesday,
March 26, at 1:30 p. m. Pall bear-
ers are some of his high school
companions.

—CUHS—

The Freshmen English class is
working on atmosphere in their

Your wife should have
telephone convenience

Out on the ranch or farm, where it's a bit of
distance over to the nearest neighbor's, the
ability to send or hear human voices is mighty
important.

Is your farmhouse in touch with the world
by telephone?

Wouldn't your wife be made glad by having
this friendly instrument at hand?

THE PACIFIC TELEPHONE AND TELEGRAPH COMPANY

**P. T. A. Will Hear J.
W. Ayer Tuesday Eve**

Next Tuesday evening, April 1,
the Campbell P. T. A. will hold
their meeting in the high school
annex at 7:30 o'clock. The speak-
er will be J. W. Ayer, principal of
the Los Gatos Union High school.
Much interest has been added to
the P. T. A. meetings this year as
the high school classes having the
most parents attending the meet-
ings during the year and the new
meetings left for this year are to
be given a party by the P. T. A. in
June.

**Mr. and Mrs. Seekins
Left For Maine Mon.**

Mr. and Mrs. W. E. Seekins, Mr.
and Mrs. F. E. Scott and Mrs. An-
nie Haggood, who have been visit-
ing Mr. and Mrs. E. E. Seekins for
the past several weeks, left Mon-
day via the Santa Fe trail for their
home in Maine.

They have been visiting all win-
ter in California and Mr. Seekins
says they may come back to Cam-
pbell to live. He also said that in
all his years as an educator never
did he see a grammar school the
equal of the one in Campbell.

Mr. and Mrs. Gayno Eddlemon,
Mr. and Mrs. R. H. Knappen and
Miss Lois Marston of Campbell and
Mr. and Mrs. Donald Lent of Oak-
land were visitors at Capitola Sun-
day.

Mr. and Mrs. Carl Field, Mr. and
Mrs. W. C. Bohnett, Mr. and Mrs.
Roy Archibald and Mr. and Mrs.
G. E. Farley and families were Sun-
day visitors at Sea Cliff.

Mr. and Mrs. Frank Mendel and
family of Palo Alto were Sunday
visitors at the home of Mrs. Men-
del's mother, Mrs. John Duncan.

Mr. and Mrs. C. E. Day, former
residents of Campbell, were up
from Salinas Sunday for a visit
with Mr. and Mrs. W. H. Stray.

Mr. and Mrs. Frank Hart, who
for the past two weeks have been
visiting with Mr. and Mrs. M. E.
Purmort, left today by motor for
their home at Anoka, Minn.

Wayne Davis, who is employed
by the signal maintenance depart-
ment of the Southern Pacific rail-
road is at home recuperating from
injuries sustained in a fall at Gil-
roy eight weeks ago. The past sev-
en weeks Wayne has been receiv-
ing treatments at the company hos-
pital in San Francisco.

Mrs. Leola Blackford, daughter
of Mr. and Mrs. H. W. Walton, left
for her home in Washington, D. C.

Mr. and Mrs. Percy Dunlap and
small son were visitors at Santa
Cruz Sunday.

Mr. and Mrs. G. Morris have for
their guests this week their daugh-
ter, Mrs. L. Woods of San Fran-
cisco.

Mr. and Mrs. A. P. Anderson
were visiting relatives in Oakland
last week.

Mr. and Mrs. M. F. Hughes and
son were visiting with their parents,
Mr. and Mrs. W. C. Stickle in Cal-
istoga last week.

compositions with a view toward
using it in stories. Some of their
first attempts will appear in next
week's issue of the Press.

on the S. S. Pennsylvania March
15 from San Francisco. She has
been visiting relatives and friends
here about four months.

Mrs. J. Maxson of Myrtle Creek,
Ore., is visiting with her sisters-in-
law, Miss Sadie Maxson and Mrs.
Mary Lanphear.

Radio owners desiring

Gas
— a safe fuel
for heating
your home

Facts published by "The National Board
of Fire Underwriters" prove that gas fuel is
the safest of all fuels.

Furthermore, physicians know that gas fuel
is absolutely safe when burned in MODERN,
UP-TO-DATE appliances. Perhaps you re-
call the old portable heating appliances
which were connected with a flimsy rubber
hose to a gas pipe. These appliances were not
vented and the results were often unpleasant.
People blamed the gas fuel. As a matter of
fact, the blame should really have been
placed upon the poorly-designed appliances.
To judge modern gas-fired equipment upon
the basis of such obsolete equipment is like
comparing coal oil lamps with modern elec-
tric lights.

In modern heating appliances, gas fuel
burns in a steel firebox. The invisible prod-
ucts of combustion go outdoors through a
chimney—just as smoke does from any fire.
In no way can the gas escape into your home.
That is why gas fuel produces healthful heat.

In addition, gas burns clean without any
smoke or dirt. It is the easiest fuel to control
and you can have an even, warm temperature
in your home without any effort on your part.

For full details about heating equipment
that burns gas fuel, see a heating contractor
or phone or call at our office.
